Subject: Request for existing storm-drain GIS/CAD, terrain, and event records - SIH 26085 Dwarka/Najafgarh pilot

Dear Sir/Madam,

I am a student at NSUT, Delhi, developing Smart India Hackathon problem statement 26085: Urban Flood Nowcasting System (Drainage and Rainfall Coupling). The attached map marks an approximate project request area. It is not an official drainage catchment, and we are requesting existing records only, not a new survey.

The project has identified I&FC planning/jurisdiction references for the Najafgarh, Palam, Palam Link, Nasirpur, Pankha Road, Bijwasan, and related drain reaches. Please confirm which divisions and agencies own or maintain stormwater assets in the mapped area and forward this request to the appropriate record custodian if needed.

Requested information

- Latest existing machine-readable storm-drain GIS/CAD: node and pipe/channel geometries, connectivity, asset IDs, dimensions/material, inlets/manholes, outfalls, catchments, and ownership/status.
- Available surveyed/as-built/design values for invert and rim levels, slopes, roughness, design capacity, pumps/gates, regulator levels, and outfall conditions. Please preserve unknown fields and label surveyed, as-built, design, or estimated values.
- Existing terrain products suitable for surface-flow work (DTM/DEM/LiDAR if held), including road crowns, underpasses, barriers/breaklines, vertical datum, horizontal CRS, resolution, accuracy, and acquisition date.
- Event-linked waterlogging/flood observations or water-level records with coordinates, date/time, measured depth and units, method, uncertainty, and dry observations if held. Incident-only reports without depth should be identified as occurrence records.
- Preferred formats are GeoPackage, Shapefile, File Geodatabase, DWG/DXF, GeoTIFF, CSV, or another documented machine-readable format; please include schema/data dictionary, source date, fees, license, attribution, and public-demo permissions.

If the department does not hold a requested record, please identify the responsible agency/division and the correct data contact. We will preserve the provided metadata and use records only under the terms you specify.

Sincerely,

Harsh Jha

NSUT, Delhi

Submission note: Attach 06_Dwarka_Najafgarh_Approx_Pilot_AOI_Map.pdf. Please confirm the correct division/record custodian before any wider public redistribution.

DWARKA MOR / NAJAFGARH - APPROXIMATE PROJECT AOI

Study area reference

Project: SIH 26085
Dwarka Mor / Najafgarh pilot
District: South West Delhi

Approximate request bounds
West: 77.015 E
East: 77.050 E
South: 28.590 N
North: 28.628 N
Coordinate system: WGS 84 / EPSG:4326
Approx. footprint: 3.4 x 4.2 km

Map legend

Red outline: request boundary
Orange/red line: larger mapped road class
Grey-blue line: other mapped road

Data source

Road context: project-supplied OpenStreetMap extract.
Snapshot date is not recorded in source metadata.
Map is not a drain survey, DEM, or flood-depth layer.

IMPORTANT

Approximate project rectangle only; not an official hydrologic catchment or surveyed asset boundary.
