

Delhi Doppler Radar Data Request

Smart India Hackathon problem statement 26085: Urban Flood Nowcasting System (Drainage and Rainfall Coupling).

Date: 29 September 2026

To: India Meteorological Department (IMD), Radar Data Supply Portal - Data Request for Delhi-HQ coverage

Contact / submission route: Submit through the signed-in Radar Data Supply Portal: <https://radarapi.imd.gov.in/>

Subject: Availability and access process for machine-readable Delhi DWR rainfall grids for a student urban-flood prototype

Dear Sir/Madam,

I am a student at NSUT, Delhi, developing a prototype for Smart India Hackathon problem statement 26085: Urban Flood Nowcasting System (Drainage and Rainfall Coupling).

Please confirm whether the Delhi-HQ Doppler Weather Radar archive or an official nowcast feed covers this approximate pilot area: Approximate project rectangle: 77.015-77.050 E, 28.590-28.628 N (WGS 84 / EPSG:4326). The attached AOI map is only a manually defined project rectangle, not a surveyed catchment.

We are seeking an availability check and the official access, license, and fee process before requesting or using any records. Priority is native machine-readable radar rainfall/QPE, not a rendered image.

Requested information

- Archived Surface Rainfall Intensity (SRI) / quantitative precipitation estimate grids and, if available, official radar-nowcast grids for June-September 2022, 2023, and 2024; please prioritize candidate project dates 4 and 9 July 2023 with 6-12 hours of context on each side.
- For each product: native format, grid spacing and projection/CRS, units and accumulation interval, issue/valid timestamps and timezone, update interval, radar/site identifier, QC flags, missing-value codes, and processing/calibration notes.
- Coverage completeness, archive/live access, delivery latency, API or download method, fee estimate, attribution, and permission/restrictions for student research and a publicly accessible SIH demonstration.
- Please identify the nearest suitable radar and advise whether the proposed boundary should be expanded to include the surrounding rainfall field.

If the archive is available, please advise the request fields and any required identity, institute, undertaking, or authorization documents. We will retain original metadata and will not present radar-image pixels as numeric rainfall grids.

Sincerely,

Harsh Jha

NSUT, Delhi

Student-prepared request; this is not NSUT letterhead or an institutional endorsement. If a recipient requires an authorized institutional letter, obtain it before formal data supply.

Source / route: Submit this supporting request through the portal's Data Request option. Portal guide: https://radarapi.imd.gov.in/Received_data/dsp_userguide.pdf. Radar request queries listed by IMD: radarlab@gmail.com.

Submission note: Attach 06_Dwarka_Najafgarh_Approx_Pilot_AOI_Map.pdf in the portal request.

DWARKA MOR / NAJAFGARH - APPROXIMATE PROJECT AOI

Study area reference

Project: SIH 26085
Dwarka Mor / Najafgarh pilot
District: South West Delhi

Approximate request bounds
West: 77.015 E
East: 77.050 E
South: 28.590 N
North: 28.628 N
Coordinate system: WGS 84 / EPSG:4326
Approx. footprint: 3.4 x 4.2 km

Map legend

Red outline: request boundary
Orange/red line: larger mapped road class
Grey-blue line: other mapped road

Data source

Road context: project-supplied OpenStreetMap extract.
Snapshot date is not recorded in source metadata.
Map is not a drain survey, DEM, or flood-depth layer.

IMPORTANT

Approximate project rectangle only; not an official hydrologic catchment or surveyed asset boundary.
