

Historical Rain-Gauge Data Availability Request

Smart India Hackathon problem statement 26085: Urban Flood Nowcasting System (Drainage and Rainfall Coupling).

Date: 29 September 2026

To: Technical Section (Data Supply Unit), Regional Meteorological Centre (RMC), New Delhi

Contact / submission route: rmcnewdelhi.ts@gmail.com | 011-24652403

Subject: Initial availability and estimate request: hourly rainfall observations for Dwarka/Najafgarh candidate stations, 2022-2024

Dear Sir/Madam,

I am a student at NSUT, Delhi, working on Smart India Hackathon problem statement 26085: Urban Flood Nowcasting System (Drainage and Rainfall Coupling).

Before submitting the formal Data Request Form, please confirm the available rain-gauge/AWS/ARG station inventory nearest to Dwarka Mor and Najafgarh and whether quality-controlled hourly records are available. The IMD procedure notes that hourly rainfall is available only for selected stations, so kindly confirm station IDs, coordinates, record coverage, and frequency first.

Requested initial period: 1 June 2022 through 30 September 2024. Candidate heavy-rain event windows include 4 and 9 July 2023, but these are project-record dates for availability checking, not verified storm labels.

Requested information

- Station rainfall in mm with timestamp/timezone, units, quality flags, missing-value codes, station ID and coordinates; please include Palam and Najafgarh only if active/archived, plus the nearest suitable official stations you recommend.
- Available temporal resolution and archive years; digital delivery format; data charges and any student/research concession; and the Certificate of Undertaking or institutional authorization needed for supply.
- Written permission/terms for student research, model evaluation, and use in a publicly accessible SIH prototype demonstration, including attribution and any redistribution limits.

This email is an initial availability inquiry. If records are available, please send the current official Data Request Form, undertaking format, and estimate process. We will review the station/date coverage and charges before accepting an estimate or making payment.

Sincerely,

Harsh Jha

NSUT, Delhi
